The following are the requirements for **Program #770131 – Common Core for First Line Underground Supervisor – Underground Soft Rock Mining**. The modular training standards manual is available from your local Ministry Apprenticeship office.

MODULE NUMBER	MODULE TITLE	NAME OF WSN COURSE(S)	DURATION (DAYS)
U6400	**Follow Safety Program**	OHS Act and Mining Regulations	1
		Introduction to Safety Programs	1
		Planned Inspection and Observation: Mining	2
		Incident Investigation: Mining	2
U6401	**Prepare for Emergencies**	Prepare for Emergencies: Underground Mining	2
U6402	**Follow Health and Hygiene Procedures/Guidelines**	Occupational Health and Industrial Hygiene: Mining	1
U6403	**Practice Effective Communications**	Practise Effective Communication: Mining	1
U6404	**Manage Work Area Activities**	N/A	
U6405	**Manage Employees**	Manage Employees: Mining	1
U6406	**Read and Follow Mine Layouts and Specifications**	N/A	
U6407	**Identify Geological Features and Supervise Ground Control Installations**	Ground Control: Underground Mining *	2
U6408	**Assess, Control and Apply Ventilation Systems in Workplaces**	Mine Ventilation: Underground Mining **	1

Please confirm requirements with the Ministry.

* **Note:** the 'Geological Features' of the U6107 module are not addressed in the **Ground Control: Underground Mining** course.

** The **Mine Ventilation** course is currently designed for first line underground hard rock mining supervisors and meets the objectives set out by the Ministry for **Module U6108: Assess, Control and Apply Ventilation Systems in Workplaces**. This module is part of Program # 770121. Although geared to the underground hard rock environment, the course may be taken by supervisors working in other mining environments. **The Ministry objectives addressed in this course surpass the objectives outlined in Modules U6408 under this program and U6306: Assess, Control and Apply Ventilation Systems in Workplaces (Program #770141, Generic)**.
