Our Mission

To deliver innovative, value-driven solutions, fueled by decades of experience, hard work and creative thinking. We remain steadfast in our commitment to zero harm while consistently setting the standard in **world-class service**.

Our Values – RICH²

Respect

Integrity

Courage

Honest

Humility

From Humble Beginnings...

- Started small in 1999 specializing in underground construction in Sudbury
- Opened our Val d'Or branch in 2019
- Opened our Timmins office in 2022
- One of Canada's largest, privately owned mining contractors

 <p>Revenue Growth and Diversification</p> <p>Drive revenue growth by expanding into new geographic and mineral markets while enhancing and diversifying our service offerings.</p>	 <p>Optimized Human Resources and Culture</p> <p>Enhance workforce effectiveness and organizational culture through accountability, advanced training, and strong communication, while maintaining an unwavering focus on health and safety.</p>	 <p>Improved Operational Efficiency</p> <p>Maximize operational efficiency by standardizing project controls, optimizing efficiency, consistently evaluating overhead, and leveraging technology.</p>

The Creation of Aki-eh DIBINWEWZIWIN

Ensuring Economic Reconciliation in our Home Town

This limited partnership has helped ensure communities are rightfully compensated for work being completed on their traditional territory while also creating high-value careers and lucrative business opportunities. Through this partnership, the communities have received over \$5M in economic contributions since 2022.

What we do

- Lateral and raise development
- Civil, mechanical and electrical construction
- Shaft maintenance
- Full mine operation and Production
- Mine Engineering
- Surface Drilling
- **Raiseboring

Why a Training Center?

- Critical labour shortage:
 1. retirements
 2. low enrollment/interest in mining overall
 3. no/low interest in certain demographics
- Limited time/opportunity to give Advanced modules
- Develop proficiency on prime equipment & processes
- Ability to train specifically for underground construction
- Champion innovation by developing and testing the latest technologies

How will Canada address demand?

- Across Canada, over 700,000 positions are accounted for by Mining and Mining-support services; 400,000 jobs are directly related to Mining
- Currently there are 5,000+ jobs available in the Canadian Mining Industry

Many positions across the country, but most prevalent in:

1. **Ontario** ~27% of Canada's mineral production. Strong in **nickel, gold, copper**
2. **British Columbia** ~18% of production. Strong in **copper, coal, gold**
3. **Saskatchewan** ~16% of production. World leader in **potash and uranium**
4. **Quebec** ~16% of production. Major in **gold, iron ore, lithium**
5. **Newfoundland** (Nickel), **Nunavut** (Gold) and the **Territories** (Diamonds & Gold)

TATC – From the start...

- Begins with an idea – how can we train construction miners?
- Train while planning – biodiversity study, portal design, Superintendents on risk assessments, coordinators on project controls
- Opportunity training during construction – surface drilling, excavators, jumbo, bolters, trucks, shotcreting, etc.

“Technica’s project preparation plans create a roadmap for sustainable growth, financial discipline, and long-term success while allowing flexibility to adapt to changing market conditions”

How we will address demand

- Continued support of primary & secondary school programs – examples – Dynamic Earth Modern mining, school tours, exhibits
- **Program development ex. Underground Construction Miner Certificate**
- Local Partnerships will help bring awareness – ex. ADLP, Women in Mining, colleges & universities
- Work on attracting diverse talent including Indigenous people, women and newcomers to Canada

Lively Highschool Tour

Partnerships for success...

- Local vendor involvement – services, materials & OEMs
- Indigenous partnership involvement
- Community & education involvement

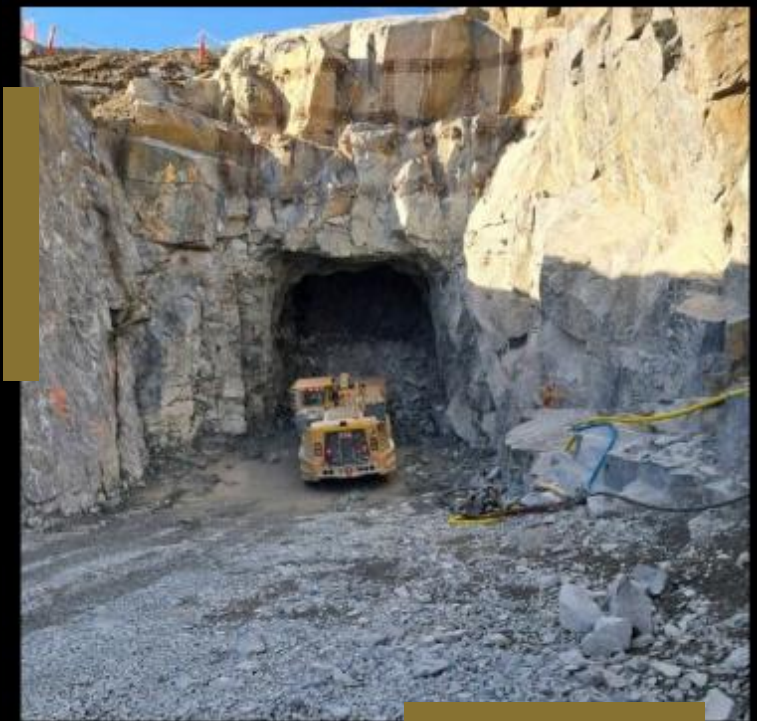

“The TATC will deliver advanced skills training for our current workforce and help expand opportunities for women & Indigenous participation in mining”

To date our TATC has been self funded!

Looking ahead...

- Mine Rescue - Emergency preparedness
- Mining Company / Client support
- Ai opportunities 
- OEM testing

We are building the people who will build the future - beneath the surface!

Thank You!
