

## Health and Safety Specialist

- **Sudbury/Sault Ste. Marie Region**

As part of a high-performing team, you will assist clients in meeting and exceeding their Occupational Health and Safety responsibilities by evaluating the quality of health and safety programs in a variety of workplaces, providing outcome-oriented consultations as well as developing clear and concise action plans. In addition to delivering high-impact training to supervisors and workers, facilitating meetings and leading industry committees, you will also assist with developing health and safety solutions as a subject matter expert.

You possess sound knowledge of adult education, have strong project management skills, risk assessment, program/system auditing experience, as well as a proven ability to provide coaching and facilitation as it relates to program planning, implementation, and evaluation. Your expertise and experience will allow you to deliver health and safety training and consulting services including but not limited to Chainsaw Operation, Propane Safety, Competent Supervisor, Mining Supervisor Common Core and CPO programs such as Working at Heights and Joint Health and Safety Committee Certification (Part 1 and various Part 2 modules).

A natural leader, you will be able to efficiently analyze complex situations, determine when additional technical support is required, develop clear recommendations, and write professional reports. Your ability to develop work plans and schedules, set and meet goals, and work with minimal supervision is complemented by your ability to build rapport and maintain relationships with internal and external stakeholders. You understand the importance of following established processes including accurate data reporting and ensure all required processes are followed and all information is captured and submitted in a timely manner.

You have obtained post-secondary education or equivalent combination of training/education, complemented with seven years (7) of health and safety experience in the forestry and/or mining sector. A Canadian Registered Safety Professional (CRSP) designation or the ability to attain is required. A valid driver's licence and access to a vehicle are required. Bilingualism is considered an asset.

This position provides a challenging career with an attractive benefits package and salary based on qualifications. If you feel you meet our needs and are interested in being a part of a rewarding career in occupational health and safety, please forward your application by **Friday, November 12, 2021** to:
